CUMULATIVE PERFORMANCE SINCE INCEPTION (Mar-31-15 to Dec-31-19)

INVESTMENT STRATEGY

The objective of the fund is to outperform the S&P 500 Index over most annual periods. The fund will invest a portion of the assets in securities intended to track the performance of the S&P 500 Index and additional exposure to a long/short portfolio, consisting of long and short positions, generally selected from the largest 500 to 700 U.S. companies by market capitalization.

HOW IT WORKS:

RESULT: 100% net long*
\$190 long / \$90 short

**We net positions that appear in both the index portion and the actively managed long/short overlay.

KEY ATTRIBUTES:

- Index based + active long/short overlay
- Core equity allocation
- Tax goal: Long-term capital gains²
- 1% management fee³

FUND ADVANTAGE:

Active long/short component is designed to be additive to index return. We expect the long/short overlay to be uncorrelated and often negatively correlated with the index return resulting in attractive upside and downside capture ratios over the long-term.

* The net long exposure is estimated and is the targeted exposure during most market environments.

¹ Net exposure excludes exchange traded funds ("ETFs") bought or sold for cash management purposes (inflows and outflows). Generally, such ETF positions are closed out within one trading day.

² A preference for long-term gains is an objective established and followed by Gotham, is not formal policy of the fund, and is subject to change at any time.

³ Please see reverse side for other fees and expenses.

The performance data quoted represents past performance. Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that an investor's shares upon redemption may be worth more or less than their original cost. The performance quoted does not reflect a 1% redemption fee on shares redeemed within 30 days of purchase. Returns would have been lower if certain expenses had not been reduced or reimbursed. Current performance may be lower or higher than the performance quoted here. To obtain performance current to the most recent month-end, please call 888-705-0545 or visit www.gothamfunds.com/performance.aspx.

The S&P 500 Total Return Index is a market capitalization-weighted index of 500 large-capitalization stocks commonly used to represent the U.S. equity market. Returns for the S&P 500 Total Return Index include the reinvestment of income and do not include transaction fees, management fees or any other costs. The performance and volatility of the fund will be different than those of the index. The index is unmanaged and investors cannot invest directly in the index.

FEES AND MINIMUMS

	Investment Minimum ¹	Additional Investment Minimum	Redemption Fee (within 30 days)	Gross Expense Ratio ²
GINDX (I Share)	\$250,000	\$5,000	1.00%	1.15%

¹ Investment minimums are waived to fee-based advisors and certain other investors.

² The management fee is 1%. The expense limitation is 1.15%. Effective July 29, 2019, the prospectus was updated to reflect that the fund now utilizes one or more swap agreements in its investment program. In addition, the fees and expenses for the fund have been updated to reflect that the fund has eliminated the investment of cash collateral from securities lending and associated expenses.

The Adviser has contractually agreed to reduce its management fee and/or reimburse certain expenses to the extent necessary to maintain the total annual fund operating expenses at the expense limitation level until January 31, 2021. See the Prospectus and Summary Prospectus for additional details.

IMPORTANT INFORMATION

** Inception Date: March 31, 2015.

Gotham Index Plus Fund shares are distributed by Foreside Funds Distributors LLC. Gotham is not affiliated with Foreside.

Mutual fund investing involves risks, including possible loss of principal. The fund is not a passive index fund and will use leverage to make additional investments which could result in greater losses than if the fund were not leveraged. The fund utilizes swap agreements in its investment program. The use of derivatives such as swaps exposes the fund to additional risks including increased volatility, lack of liquidity and possible losses greater than the fund's initial investment. Short sales by a fund theoretically involve unlimited loss potential since the market price of securities sold short may continuously increase. It is anticipated the fund will frequently adjust the size of its long and short positions and thus may experience high portfolio turnover which may increase brokerage costs.

An investor should consider the investment objectives, risks, charges and expenses of the fund carefully before investing.
